

COLLABORATIVE INTELLIGENCE

AS AN INNOVATION PATHWAY

CONCEPT NOTE

IDEAS THAT SERVE JUSTICE **aga mi** SUMMIT, 2022

WHAT IS COLLABORATIVE INTELLIGENCE?

Collaborative Intelligence is a practice wherein cross-functional teams across or within organizations share data and intelligence to create an infrastructure and systems layer on which future innovation can happen.

Collaborative: Multiple partners or teams coming working together towards a common objective.

Intelligence: Quantitative or qualitative intelligence that enables future innovation with regard to the shared common objective.

WITHIN THE ELC CONTEXT

Exploring pathways and limitations of how legal, governance and policy teams, within and across enterprises, can collaborate with business-facing teams to share data and intelligence to solve challenges that affect the business at a micro-level or the sector at a macro-level.

TYPE 1

INTRA-ORGANIZATIONAL COLLABORATIONS

Examining how legal can play a leading role in driving cross functional collaboration with teams such as Product, Sales, Finance, Procurement, HR to proactively resolve business challenges as opposed to a reactive role.

TYPE 2

CLOSED INTRA-SECTOR COLLABORATIONS

Examining how legal and business teams across a closed group of organisations in the same sector collaborate to share intelligence and data with the aim to create robust governance and policy frameworks, especially in newly-regulated sectors.

TYPE 3

OPEN INTER-SECTOR COLLABORATIONS

Examining how legal and business teams across two or more sectors can collaborate and create a platform to share intelligence and data, to facilitate innovation and policy change to bring about greater public good.
